

Customer Testimonial: Technology

Top 5 Global Telecom Deploys AI Security to 150,000+ Employees in Under 10 Days with WitnessAI

Company Profile

A Tier-1 global telecommunications and ICT services provider operating a network that spans 190+ countries, supports hundreds of thousands of enterprise customers, and manages a large portfolio of data centers. The company delivers network, cloud, data center, and security solutions worldwide across multiple subsidiaries.

Business Challenge

Business units requested access to generative AI tools, but the security organization refused to approve rollout without visibility into how those tools would be used. The company operates across three subsidiaries, each with its own security tenant, adding deployment complexity. Leadership set a firm requirement: no AI access without security controls in place.

Solution

Following a successful proof of concept, the company issued a purchase order with an aggressive timeline. WitnessAI's architecture proxy chains off existing network infrastructure, requiring zero changes to endpoint configurations or user workflows. The team integrated across all three global security tenants within 10 days, providing comprehensive security and governance of every AI interaction for the entire 150,000+ employee population.

"No Witness, No AI"

Head of Strategy and Infrastructure

Top 5 Global Telecommunications Provider

Outcome

- Production deployment across 150,000+ employees in under 10 days
- Integration with 3 separate global tenants (one per subsidiary)
- Comprehensive visibility into AI usage enterprise-wide
- Business approved to proceed with AI adoption across all employees

Secure Your AI Adoption
